Research Interests

I am deeply invested in the interdisciplinary sphere where Computer Vision intersects with Machine Learning, with a distinct focus on representation learning applied to human actions and 3D Computer Vision. Moreover, my ambition is to pioneer advancements in integrating large language models to fortify the fields of human action recognition, 3D scene interpretation, and object detection. My intent is to apply these developments specifically to emerging technologies such as Virtual Reality (VR), Augmented Reality (AR), and Autonomous Vehicles, aiming to enhance their functional capacities and applications.
